To improve your score on pretty much any word game, you need to familiarize yourself with several sets of words. Check out our Scrabble Word Lists, which are invaluable for improving your score. If you get acquainted with words about 2 letters and words with Q, but not in them, you will have a huge advantage. The 3 letter hook allows you to create 2 words in your game, one that adds a letter then the beginning (or end) of the word, and your own word that you actually spell. You can also access an anagram solver to solve your problems with finding a reasing. Currently it's the only word anagram solver, but we also have a more word generator as well. It is also important to remember to play defense in Scrabble / WWF. This means that you should not open a triple letter word tile for your opponent(s) because they can score large. The only exception is if you're yourself scoring big in the process, or if you think your opponent can't take advantage of the triple word tiles. Even better, if you have a rare combination of letters (and blanks) that would allow you to use triple tile words in the next turn after opening, while still hard for your opponent to use.
